**Abstract:** The invention relates to a high pressure cleaning device (1) comprising a motor (3) and a high pressure pump (4) having an inlet (24) and an outlet (25) for a cleaning liquid. The inventive device also comprises a housing (5) surrounding said motor (3) and said pump (4). The aim of the invention is to improve arrangement of accessories (34, 35, 29) and handling of said device. For that purpose, said housing (5) is in the form of a suitcase and exhibits a base surface (10), a carrying handle (13) and two housing halves (6, 7), at least one of said halves having the shape of a shell. In addition, the motor (3) and the high pressure pump (4) are attached to a housing half inside said housing (5) which is provided with a through-opening (26) for the inlet (24) and outlet (25) of said pump (4) or for a duct leading to said inlet and outlet. The inventive high pressure cleaning apparatus (1) is provided with a receiving compartment (33) for accessories (34, 35, 29), which is located close to the motor (3) and pump (4), inside the housing (5).
